

GAJESKE, INC.

POLYETHYLENE SPECIALISTS

Fire Protection Piping Systems for industrial plants typically require that all components have Factory Mutual approval.

Gajeske, Inc. is a nationwide distributor of HDPE pipe manufactured to Factory Mutual standards. Both fittings and pipe are available to be marked with the Factory Mutual diamond approval. *Gajeske, Inc.* provides McElroy fusion equipment for sale or rent as well. Certified Fusion Technicians are also on call today to provide Training services on proper heat fusion procedures or to assist your team in the field.

- High Pressure Rated
- 100% Leak-Free

The Factory Mutual Research Corporation, (FMRC) is a testing laboratory that is recognized worldwide for its work testing components for fire protection systems. Components for fire protection systems are tested to make sure that the products meet performance, safety, and quality standards. Factory Mutual (FM) approval provides proof that components meet the requirements of a fire protection system now and will continue to meet these requirements in the event of a fire.
