

GAJESKE, INC.

POLYETHYLENE SPECIALISTS

Irrigation Piping

Gajeske, Inc. is a nationwide distributor of HDPE pipe for Golf Course irrigation piping systems. Regardless of whether you are a designer, supplier, contractor, or golf course superintendant, we have the inventory, expertise, and resources to provide the best piping solutions and service in our industry.

For over 25 years, Gajeske has positioned itself at the forefront of the polyethylene industry providing services related to material takeoffs, heat fusion training, operator qualification, fusion machine rental, field welding, and general troubleshooting.

HDPE can also be easily coupled to your existing PVC, ductile iron, or cast iron waterline. For more information, please email us at Gajeske@Gajeske.com.

Gajeske@Gajeske.com

Since the 1960's, polyethylene pipe has been used for golf course irrigation applications due to its extreme light weight, flexibility, durability, corrosion resistance, and 100% leak free design. HDPE adapts to your surroundings and can bend to a radius of 25 times its diameter, meaning fewer 90° bends overall, lessening the chance for water hammer and virtually no chance for leaks.
